PEDESTAL ADVANTAGES

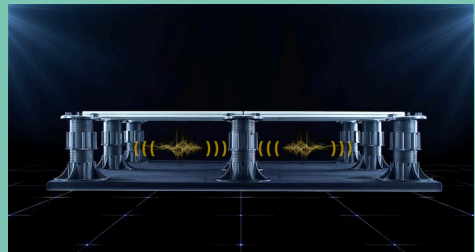

Acoustic Insulation

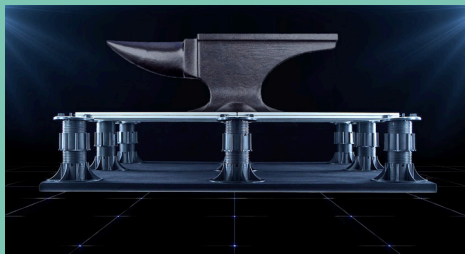

Quick Water Drainage

Perfectly Level Surface

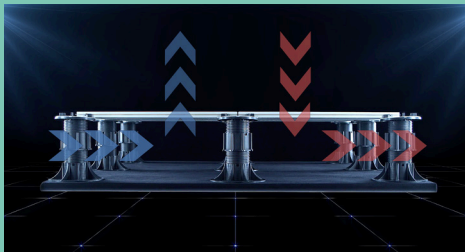

Absorption of Structural Movement

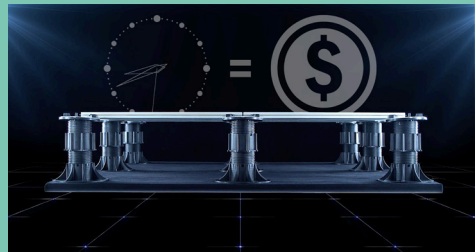

High Strength and Resistance

Entirely Recyclable

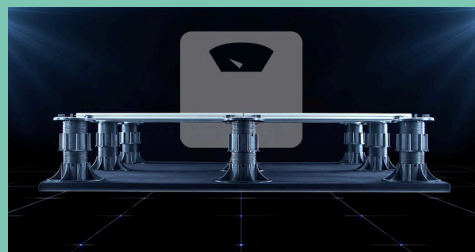

Better Thermal Insulation

Time Effective Installation

Easy Access and Concealment

Low Weight

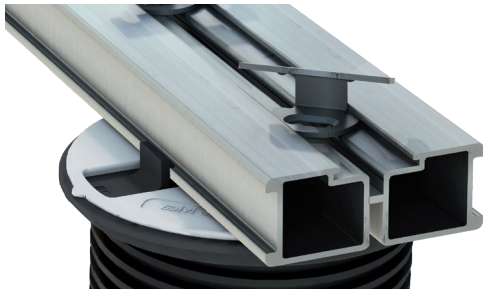

HEAD TYPES

Pedestal Head for Aluminium Joist System

The Aluminium Joist System is assembled without the use of screws and is composed of three exclusive features:

- Pedestal head with two pre-formed clips securing the Aluminium Joist
- Aluminium Joist
- Sliding and rotating clips for fastening

The clips can be customised upon request to suit the chosen floor type.

Pedestal Head for Aluminium Joist System

The Wood Deck System is designed to accommodate and permit the fastening of all types of existing joists on the market.

The slots in the head enable mechanical coupling with joists 18mm thickness and above, thanks to the removable pre cut tab.

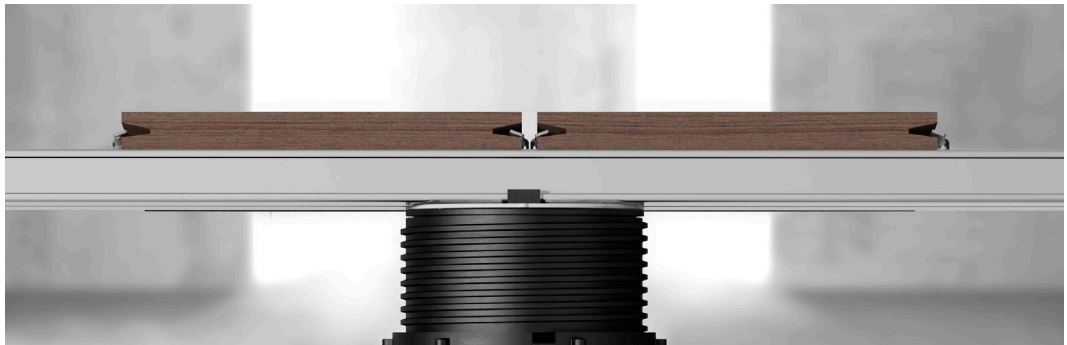

NM

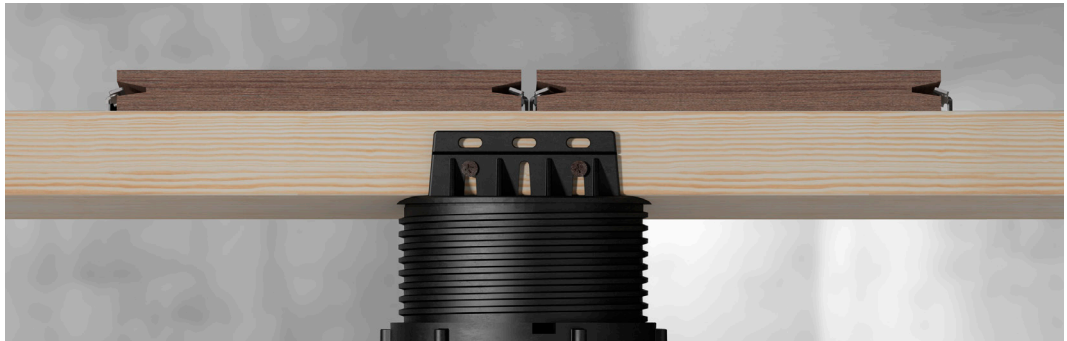

ADJUSTABLE HEIGHT SUBSTRUCTURE WITH NM SERIES PEDESTAL

The NM Adjustable Height Pedestal accommodates all joist types utilising the interchangeable head, which adapts to both the Aluminium Joist System, as well as the Wood Deck System.

A simple rotation of the base allows you to adjust to the millimetre every type of substructure and obtain stable, perfectly level flooring.

SE

SELF-LEVELLING AND ADJUSTABLE SUBSTRUCTURE WITH SE SERIES PEDESTAL

The SE Self-Levelling and Adjustable Pedestal accommodates all joist types. The product's main strength is its interchangeable head, which adapts to both the Aluminium Joist System, as well as the Wood Deck System.

The unparalleled performance of the tilting head is capable of eliminating screed slopes of up to 5%, resulting in a perfectly level floor, with no need for additional work or extra spacers.

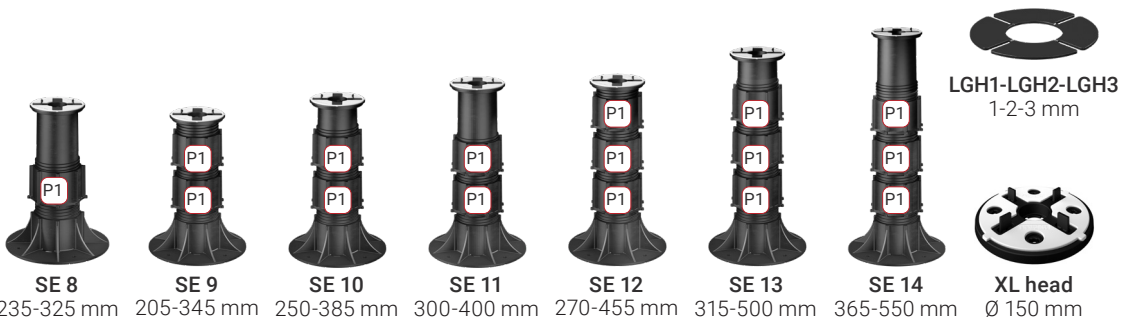

It's the most flexible, elegant and safe solution that's ever been conceived for terraces, decking and poolside applications.
