Reflecta-White Plus[™] for light diffusion

Performance Comparison of Reflect-White Plus™ Flat Metal Roof 0-5° & Flat Suspended Plasterboard Ceiling				
Insulation		Summer (Downwards)	Winter (Upwards)	Thermal Break
1*	CRIS [™] – Reflecta-White Plus [™]	RT 4.1	RT 1.5	0.12
2*	GI Building Sciences™ Reflecta-White Plus™	RT 1.2	RT 1.0	0.12

1* Thormal calculations for Clareducts by James Frields as not 45/N75 4950 183. Aircross 200ms

Reflecta-White Plus™ is the ultimate choice of insulation for increasing indoor reflective lighting performance.

Reflecta-White Plus™ contains an exposed ice white face and reinforced scrim foil backing with a thermo-cellular structure.

Reflecta-White Plus[™] can be effectively applied for light diffusion and as a decorative finish. Also when included as part of the CRIS[™] or GI All-In-One[™] systems, Reflecta-White Plus[™] delivers both decorative and superior thermal performance.

Features - Fact vs Fiction

- ☐ 15 Year Warranty
- Decorative Finish and Thermal Insulation in One
- ☐ Class 2 Vapour Barrier
- 20m x 1500mm Roll
- ☐ Structure enables it and Other Cellular Materials to be easily installed
- ☐ AS 1530.2 & AS/NZS 1530.3 Compliant

Key Benefits

- ☐ Reduced Cost of Roof Construction compared to Fragile Decorative Sarking
- ☐ White Surface lends to Better Light Diffusion than Reflective Aluminium Surfaces
- ☐ 1500mm Wide reduces Wastage compared to the 1350mm Wide Foam Product
- ☐ Fully Recyclable
- □ Able to be Cut to Length for Major Project
- ☐ Cost of Raw Materials More Stable than Foam ensuring Long Term Cost Competitiveness
- ☐ Able to be combined with any other GI Building Sciences[™] system for High Thermal Properties
