

# STEEL FRAME BRAD

## Product Description

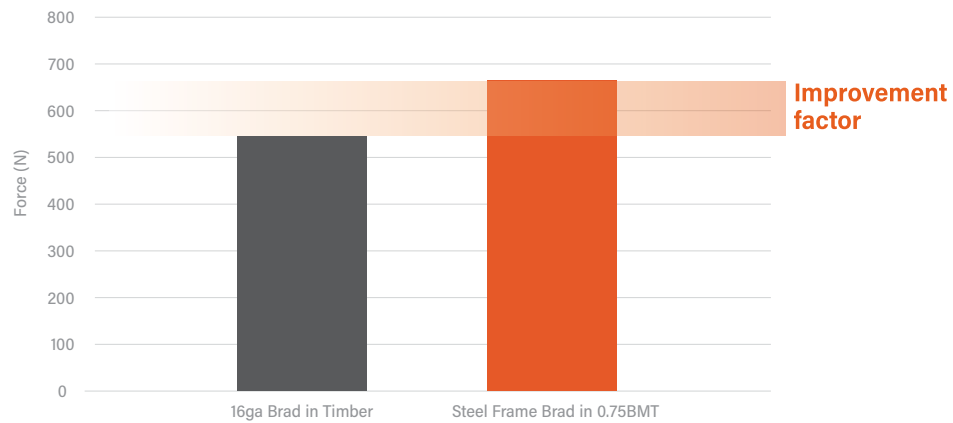

Steel frame brad designed to fix trim to light gauge steel frames.

## Product Advantages

- Simplifies installation of mouldings in steel frame houses with no fiddly gluing or screwing.
- Holds stronger than a 16 Gauge C brad into timber, requiring 100NM more force to withdraw the brad from steel frame.
- Round shank, conical point and specially formulated resin for extra hold in steel.
- Paslode steel frame brad is a powerful tool and fastener system, reducing your time on the job.

Product Code	Description	Length	Diameter	Head	Tip	Shank	Finish	Fuel Cell	Quantity
B20638	38MM STEEL FRAME HARDENED BRAD	38MM	1.7mm	ND	Conical	5MM	Zinc Plated	2	2000
B21645	45MM STEEL FRAME HARDENED BRAD	45MM	1.7mm	ND	Conical	1.5MM	Zinc Plated	2	2000

## Withdrawal Testing

Steel frame brads are engineered to be used with a Paslode straight bradder and the 16ga nose plate.
