SLABMATE[®] PRO

It's a new, innovative high performing insulation panel

Slabmate[®] Pro is an addition to the slab on ground insulation solutions. With increased compressive strength and thermal resistance, **Slabmate[®] Pro** is the perfect solution for commercial and residential projects.

Slabmate[®] Pro is a high density expanded polystyrene (EPS) insulated panel. This high performance panel is a lightweight, water resistant insulation panel with exceptional thermal resistance that is easily installed to increase thermal efficiency of the project. The high density EPS is durable and will maintain performance in all conditions. **Slabmate[®] Pro** is available in a range of thicknesses to suit the requirements of the project.

FEATURES

Lightweight

Easy to install

High Compressive Strength

Creates Thermal Barrier

High Thermal Resistance

Durable and Long Lasting

Increase total insulation

No CFC's or ozone depleting properties

Delivers high R-Value rating

Will not breakdown overtime

Cost effective and fast to install under slab product

	SMP-40	SMP-50	SMP-60	SMP-70	SMP-80	SMP-100
