INSTALLATION Refer to installation instructions. The bath can be installed using a flexible connector pipe (not supplied). The bath is supplied with adjustable support feet on the base frame of the bath. Position the bath and use the adjustable feet to level the bath. Leave a 3mm void between the base of the bath and the floor. Use silicone around the base to seal the bath to the floor. Allow a 20mm gap in the silicone seal as a weephole (gap is designed to reveal any plumbing leakage).

Use acetic cured silicone sealant. Do not use epoxy type adhesives. Always use the actual product to verify placement.
