contemporary timber lining **BY HURFORD'S**

WOODLINE

contemporary timber lining **BY HURFORD'S**

woodLINE brings a modern contemporary style to an interior or undercover patio space and can be installed vertically, horizontally or diagonally. The hidden tongue and groove joining system allows a quick and easy install with a line indicating where to nail. Not only does woodLINE look impressive, but it also provides a texture element in a selection of Australian hardwood timber species – Blackbutt, Brush Box, Grey Ironbark, Silvertop, Spotted Gum and Sydney Blue Gum.

woodLINE is reversible with a choice of profiles – Two Strip, Shadow Line or Open VJ. The profile Two Strip visually provides a multiple modern clean line option, with a one board installation. The popular Shadow Line profile presents with a sleek edged joint, making a stylish statement throughout a home. Open VJ profile is a classic design, delivering a traditional look in a contemporary home.

One of the simplest ways you can help protect our forests is to look for PEFC certified suppliers. It means that the forest-based material product comes from a PEFC certified forest. This is a forest that is managed in line with the world standard environmental requirements. Hurford's are a PEFC certified manufacturer and supplier.
